## FASTENING SYSTEM

Exposed Fastener # 10 – 12 x 6 x 1 1/2" HWH

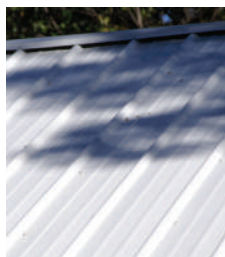

## MATERIALS

Steel Grade 50/E per ASTM A-792

Steel Grade 80/D per ASTM A-792

## COLOR OPTIONS

Galvalume and Ceram-A-Star 1050 Stock Color - Kynar (available through special order)

**W**hy would we talk about price when the initial cost of a metal roof is usually higher than the cost of an asphalt shingles roof? Because metal roofs can actually cost much less in the long run. Consider the Classic Rib metal roof, one of the most popular styles for residential applications. Combining beauty and durability with affordability, it's available in a wide range of attractive colors and paint finishes. Best of all, it has a lifespan that doubles or triples that of asphalt shingles which inevitably fade with time, leak and require costly repairs. But a metal roof, which can't rot, crack, split or break, will give you decades of worry-free savings, *and everyone likes the sound of that!*
